

Risk-based Decision Making in Water Resources V: Proceedings of the Fifth Conference Held in Santa Barbara, California, November 3-8, 1991 (Hardback)

By -

American Society of Civil Engineers, United States, 1992. Hardback. Condition: New. Language: English . Brand New Book. This proceedings, Risk-Based Decision Making in Water Resources V, contains edited papers presented at the Fifth Engineering Foundation Conference held in Santa Barbara, California on November 3-8, 1991. During the Conference there was a growing sense of the need for a stronger theoretical and methodological foundation to deal with risk of extreme and catastrophic events. Emerging issues such as the possibility of global climate change, the safety of dams under extreme hydrologic conditions, the protection of lives and properties from catastrophic natural hazards, the protection of our groundwater and surface water resources from major contamination by toxic and hazardous materials, and the nationwide state of deterioration of our water resources and other public works infrastructure linger and call for more, concerted effort in addressing them.

## Reviews

This ebook is wonderful. I could comprehended every thing out of this created e ebook. I am just effortlessly can get a satisfaction of reading a created pdf.

-- Federico Nolan

This ebook could be worthy of a read through, and far better than other. I am quite late in start reading this one, but better then never. I realized this publication from my dad and i advised this publication to learn.
